*NOTES ON SOME OF THE MORE IMPORTANT FIGURES PRESENTED IN THIS VOLUME.

The practice introduced last year of printing an abstract of notes on the figures published in each part of the Statistical Register has been found to supply a want, and is therefore continued in the present issue. It will be seen that once more the features of the prevailing conditions and influences during the period covered by these statistics are faithfully reflected in the changes of the figures. Distinct progress is the characteristic of the greater part of them, as might be expected since the advent of peace, and may no doubt still more confidently be hoped for in the future.

S. BENNETT,
Government Statistician.

Government Statistician's Office,
Perth, Western Australia,
12th March, 1921.

PART I.—POPULATION AND VITAL STATISTICS, 1919.

The chief feature of the Population Statistics for the above year was the gain of 18,213 persons, viz., 3,347 due to excess of births over deaths, and 14,866 to excess of arrivals over departures. The bulk of the latter excess consisted of 14,650 returned soldiers and 59 returned nurses, all of whom except one soldier remained in the State. Of the total number of 32,561 immigrants, 25,494 of whom were males, 13,233 came from the Eastern States of the Commonwealth, and of these 6,259 arrived by the trans-continental train. By the latter means 7,470 departed, whilst 7,129 travelled to the Eastern States by sea; the total number of emigrants being 17,695, of whom 11,193 were males. The increase of the male population was 15,438, and that of the female population 2,775.

The birth-rate, 21.4 per thousand of the mean population, was a further decline from that of the previous year, 22.8. In view, however, of the largely increased population due to arrivals, this is neither cause for astonishment nor for alarm. It is, however, worthy of note that the total births also still continued to decrease, viz., from 7,106 to 6,937. The departure in the early portion of 1918 of a considerable number of men, many of them probably married, would no doubt account for this, those returning before 1919 having in all likelihood, in most instances, had no wives in the State. A curious feature with regard to births is the fluctuating number of those that during the past five years took place in public institutions, the figures being 281 for 1915, 354 for 1916, 327 for 1917, 641 for 1918, and 483 for 1919.

The influenza epidemic was responsible for a very considerable increase not only in the total number of deaths, viz., 2,340 males and 1,250 females, as against 1,774 males and 1,059 females in 1918, but also in the death-rate, viz., 11.1 per thousand, as against 9.1 in 1918. The deaths arising from influenza numbered 538, and from pneumonia and broncho-pneumonia 210. Phthisis and cancer also showed increases, the former from 245 to 289, the latter from 218 to 251. The rate of infantile mortality, which for two years had been considerably lower than previous records, advanced again, rising from 57.3 to 61.3.

The marriage rate, which during the war years had fallen distinctly low, manifested a marked upward tendency in 1919, when the figure was 6.8, as against 5.2 in the preceding year, the total number of marriages being 2,194 in 1919, as compared with 1,612 in 1918.

A remarkable feature of the figures for the principal towns is the dissimilarity of their fluctuations during the past two years. The marriages and deaths increased in all, the former especially in Perth and Fremantle, the latter more particularly in Perth and Kalgoorlie. The births, however, show a considerable falling-off at Boulder and Kalgoorlie, although a slight increase in Perth and Fremantle. This may probably be an effect of the movements of the numbers of departing and returning soldiers during 1918 and the earlier part of 1919.

*At the end of these "Notes," two tables will be found on pp. XIX. and XX, which were not available at the time the respective parts to which they belong were printed.

No figures relative to the population of the metropolitan area of the capital, extending within a radius of slightly more than 10 miles, are at present published in this Part, those prepared in the Statistical Office being a more or less hypothetical estimate. It may be added, therefore, that this population, on 31st December, 1918, was roughly estimated at 56,000 males and 77,000 females, and on 31st December, 1919, at 62,000 males and 80,000 females, the mean population during 1919 being calculated at 59,350 males and 79,190 females.

PART II.—PUBLIC FINANCE, 1919-20.

This Part gives in condensed form the leading figures of consolidated revenue and expenditure therefrom for the year 1910-11 and the past five years. The main features of Loan Expenditure are tabulated for the separate five financial years ended 30 June last, as are also the joint totals for all preceding years. A table giving details of the Property Sales Fund is given on a similar basis, showing the total receipts from this source to 30th June, 1920, to have been considerably over a million pounds. The particulars of Public Debt and Sinking Fund are classified under their principal headings for a similar series of years, and reveal the fact that the average nominal interest payable on the entire Public Debt was, on 30th June, 3.90 per cent., whilst the average interest borne by the Sinking Fund securities was 3.57 per cent. This part of the Register concludes with two Income Tax returns, showing the numbers of taxpayers, their total incomes, and the amounts paid, classified respectively according to incomes and occupations.

PART III.—ACCUMULATION, 1919-29.

Banking.

The number of Cheque-paying Banks operating in this State during 1919 was eight. The rates of exchange on Drafts and Bills for each quarter were, for New South Wales, Victoria, South Australia, and Tasmania ⅝ per cent.; Queensland ⅞ to 1 per cent.; and New Zealand 1 per cent. These rates have not varied since 1917. The rates for London, ½ per cent. on Drafts and 1 per cent. on Bills, are the same as in 1918, as are also the rates at 60 days' sight on London, ⅜ per cent. discount on Drafts and 1⅞ per cent. on Bills. The rates for each quarter of Discount on Bills and Interest on overdrafts, 6 to 8 per cent., and Interest on Fixed Deposits for three months, nil to 2½ per cent.; six months 2 to 3½ per cent.; twelve months 4 per cent., and two years 4½ per cent., are, with the exception of a slight variation in the interest for twelve months and two years, not altered from the rates ruling in 1918.

The total average Liabilities of all Cheque-paying Banks, in 1919, was £11,223,541, and the Assets £15,422,309. The latter amount is an increase on the previous year of £1,402,437.

In the State Government Savings Bank the amount received in Deposits during the year ended 30th June, 1920, was £6,045,929, and the Withdrawals amounted to £5,936,574. The amount due to Depositors at the end of the year was £5,739,029, which is £285,107 in excess of the previous year. The number of accounts at the end of the year was 131,263, and the average amount standing to the credit of each account £43.688.

The School Penny Savings Bank received during 1919-20 £24,689 in Deposits, and paid out £19,449. The amount due to Depositors at the end of the year was £45,510, an increase on the previous year of £6,286. The number of accounts at the end of the year was 131,263, and the average amount standing to the credit of each account £1.392.

The assets of the State Savings Banks for 1919-20 were £5,859,495, of which the sum of £4,131,376 was invested in Government Securities. The Gross Revenue was £235,850, out of which an amount of £177,992 was allotted to Depositors for interest.

The Commonwealth Savings Bank received during 1919-20 in Deposits £2,173,634, and the Withdrawals were £2,188,335. The amount due to Depositors at the end of the year, £1,473,301, is, owing to the excess of withdrawals over deposits, consequently less than the previous year by £36,027. The number of accounts at the end of the year was 47,462, and the average amount standing to the credit of each account £31.042.

Life Assurance.

The number of Life Assurance Companies operating in this State during 1919 was 11; this is one in excess of the previous year, the Life Insurance Company of Australia, Ltd., having commenced business during the latter part of 1918.

The total assets of all the companies were £348,637,157, and the assets in Western Australia £3,672,313, which latter amount is an increase on the previous year of £181,579.

The new ordinary business done in this State during 1919 was, for Assurances, 4,667 policies covering an amount of £1,389,442 assured; Endowments, 614 policies for £74,748 assured; and annuities, five policies for £237.

The ordinary business in existence in this State at the end of 1919 was:—
Assurance Policies, 33,173; sum assured £9,596,768.
Endowment Policies, 2,991; sum assured £328,708.
Annuity Policies, 31; total per annum £1,355.

These figures show increases on the previous year of 2,227 policies, or £844,128, in Assurances; 190 policies, or £29,922, in Endowments, and a decrease of £23 in Annuities.

Four of the above companies also do Industrial business in this State, and the New policies issued during the year were, for Assurances 13,861 for £546,498, sum assured; and Endowments 244 for £14,166, sum assured.

The Industrial business in existence in this State at the end of the year was:—
Assurance Policies, 60,527; sum assured £1,869,055.
Endowment Policies, 3,019; sum assured £84,329.

The Assurances show an increase on the previous year of 4,671 policies, or £223,533 sum assured; whilst the Endowments show a decrease of 107 policies, or £1,903 assured.

General Insurance.

The Revenue, £404,594, and Expenditure £326,039, show increases on the previous year of £10,706 and £9,367 respectively. The Losses, £147,620, are less by £4,053 than in the previous year. The principal classes of insurance were: Fire, with a revenue of £245,157; Employers' Liability and Workmen's Compensation, £63,790; and Marine, £45,848.

Friendly, Co-operative, and Building Societies, and Industrial Unions.

The number of Registered Friendly Societies in 1919 was 15, with 18,388 Benefit members at the end of the year. The Revenue was £104,904, and the Expenditure £108,397. The funds at the end of the year amounted to £278,653. There were also 22 Specially Authorised Societies, whose Revenue was £13,882, and Expenditure £13,607, with Funds at the end of the year amounting to £15,118.

There were 12 Building Societies in existence in 1919, with 3,347 members. Loans to the extent of £62,604 were granted during the year, and £185,214 was invested on Mortgage. The share capital was £153,408. Co-operative Societies, of which there were 25, had 2,676 members. The total Sales during the year amounted to £182,608, and the assets to £157,544. The Share Capital was £20,721. Industrial Unions and Associations, of which there were 178 on 31st December, 1919, had a membership of 32,187. The Revenue was £59,819, and the Expenditure £57,421.

PART IV.—INTERCHANGE, 1919-20. TRADE AND TRANSPORT STATISTICS.

The returns cover the closing months of the late War and the dawn of more peaceful times, which promise the gradual removal of the various restrictions of war on trade.

The import tables, when compared with those for the preceding year, show an upward movement in the volume of trade, while a slight variation in the sources of supply is noticeable also. The totals for the war period are as follows:—

Source of Supply.	1914–15.	1915–16.	1916–17.	1917–18	1918–19.
	£	£	£	£	£

Foreign Countries	1,064,511	1,002,962	1,042,833	726,889	959,873
Total Imports	8,301,280	8,983,000	9,382,210	7,617,583	8,023,990

It is interesting to note that, while the total imports during the years of the titanic struggle of nations amounted to £42,308,063, no less than 88 per cent. represented the contributions of countries flying the British flag. A comparison between the figures for the principal countries of origin during the first and last years of the period is interesting.

Turning to the Export records, the figures here dealt with are those relating exclusively to merchandise. The returns are:—

Here again it is interesting to note the steadiness of trade, while the gradual release of shipping from the urgent requirements of War for the more peaceful exigencies of commerce distinctly reflects itself in the trade of the year; particularly is this noticeable in the increase to oversea destinations.

Customs and Excise Revenue.—The former, in sympathy with the revival shown in oversea imports, shows an upward movement; the collections in 1914-5 being £764,514, falling gradually to £396,835 in 1917-18, and rising to £400,663 in 1918-19; while the Excise collections, derived from internal sources, rose from £117,012 to £274,650 in the same period.

Shipping.—Here a strong upward movement is noticeable, due probably to the large number of men-of-war and troop transports calling at various ports. During 1914-5, 650 vessels aggregating 2,366,855 tons, entered the State, increasing to 658 of 2,491,537 tons in 1915-16, to 728 of 2,548,339 in 1916-17, then rapidly declining to 312 vessels of 1,094,000 tons in 1917-8 and, following the cessation of hostilities, rising again quickly to 637 of 2,122,439 tons in 1918-19. Several other tables explicitly set out the transactions of the Fremantle Harbour Trust, Bunbury Harbour Board, and Government Shipping Offices; Wrecks, Casualties, etc.

The balance of the Volume is devoted to tables dealing with the Railways and Tramways, both Government and private, and the records of the Post and Telegraph Department within the State.

PART V.—LAND SETTLEMENT, AGRICULTURE, LIVE STOCK, AND METEOROLOGICAL STATISTICS, 1919-20.

Land Settlement.—On the 31st December, 1919, a total of 8,682,107 acres of land was absolutely alienated, 13,590,282 acres were in process of alienation, and 253,654,947 acres were leased or held under license; these figures show increases on the previous year of 165,899, 361,419, and 31,940,004 acres respectively.

During the year 1919, 420 acres of town and suburban lots were sold by public auction, 1,006 Crown grants were issued for holdings aggregating 165,478 acres; 544 applications were approved for 239,324 acres conditionally alienated, and 1,058 other applications were approved for 618,576 acres.

Under the Agricultural Land Purchase Act, 318,437 acres were occupied on 31st December, 1919, out of an available area of 328,857 acres.

On the 29th February, 1920, there were 15,028 holdings of alienated lands, with an area of 16,206,342 acres, and 1,032 holdings held under lease or license, containing 165,181,571 acres, from which Statistical Returns were collected. The former shows an increase on the previous year of 99,004 acres, and the latter a decrease of 799,212 acres.

The total acrea of land cropped or prepared for cropping, cleared, ringbarked, etc., during the season 1919-20 was 7,325,519 acres, which is a decrease on the previous year of 257,197 acres.

The value of buildings (for sheltering stock, produce, and machinery) and implements and machinery on all holdings on 29th February, 1920, was £3,958,442, which is an increase on the previous year of £248,402.

Agriculture.—During the season 1919-20 the acreage under crop showed an increase of 23,075 over the previous season, the total being 1,628,163 acres, against 1,605,088 for 1918-19. This is the first year to show an upward tendency in the area cultivated since the beginning of the war period.

The principal increase in production was in wheat, viz., 2,377,563 bushels above that of the previous season, the figures for 1919-20 being 11,220,950 bushels and for 1918-19, 8,845,387 bushels. Oats, 2,486,918 bushels; Barley (malting and other), 116,037 bushels; Hay, 379,025 tons, and Potatoes, 13,240 tons, also showed considerable increases, viz., 987,229 bushels, 34,586 bushels, 129,011 tons, and 1,543 tons respectively.

The wine produced in 1920, 162,397 gallons, was less by 37,135 gallons than in 1919.

The total acreage under fruit trees, 19,689 acres, is a decrease on the previous season of 634 acres, and the production of lemons, pears, quinces, and figs shows a slight decrease in each case, but the production of all other kinds of fruits shows increases, the apple crop being particularly heavy, 629,757 bushels being produced as against 344,570 bushels for the previous season.

Grape vines, 2,975 acres, show only the slight increase of 39 acres on the previous year, whilst the production of table grapes, 43,224cwt., for wine making 31,101cwt., and for drying 28,259cwt., shows increases in each case on the previous season of 5,394cwt., 1,328cwt., and 12,438cwt. respectively.

Small fruits show an increase over the previous year in acreage of 40 acres, and in value of £1,805.

Great advances were made in the production of dried fruits during the season, as shown by the figures below for the last three seasons:—

	Raisins.	Sultanas.	Currants.
	cwt.	cwt.	cwt.
1920	3,181 ..	378 ..	4,307
1919	1,927 ..	236 ..	2,157
1918	609 ..	94 ..	1,948

The dairying industry continues to show decided progress each year. In butter, 1,980,273lbs., there was an increase on the 1918 figures of 190,883lbs.; in bacon, 1,858,285lbs., an increase of 591,659lbs.; in ham, 191,562lbs., an increase of 45,671lbs.; in milk, 9,607,677 gallons, an increase of 1,063,882 gallons.

The value of production of poultry and eggs, £191,288, is an increase on the previous year of £1,817, whilst the quantity of honey produced, 336,206lbs., is a decrease on the previous year of 79,410lbs.

The total number of persons employed on farms and stations during 1919 was 21,903 males and 7,215 females, of whom the majority were employed in farming. The nationality groups of those employed were:—White races, 19,287 males, 5,761 females; Asiatics, 636 males, 15 females; and Aborigines, 1,980 males, 1,439 females.

It will be noticed in looking at Table No. 28, value of certain articles imported into this State, that not as much headway as might be desired has so far been made in obtaining from the soil products that might be produced here.

The value of such articles imported during 1910 was £1,967,529, whereas in 1919-20 it had risen to £2,732,270.

Live Stock, 1919.—Horses, 174,919, show a decrease on the previous year of 5,175; Cattle, 880,644, a decrease of 63,203; Sheep, 6,697,951, a decrease of 485,796; Pigs, 58,155, a decrease of 27,708; Camels, 6,137, an increase of 415; Mules, 1,109, an increase of 340; Donkeys, 5,779, an increase of 135, and Goats, 31,997, a decrease of 3,824.

Cattle and sheep show an increase over the previous year in the South-Western portion of the State, but the drought during 1919 depleted the herds in the Murchison and North-West portion of the State, to the extent of causing the total decreases shown above. The decrease in horses is owing to the same cause, and also to the fact that breeding was not gone in for as extensively as formerly.

The decrease in pigs is principally owing to the high prices ruling for bacon, etc., and to the fact that in consequence of the high price of wheat farmers are not going in for that class of stock so extensively.

A new table has been inserted this year, showing the Live Stock (Horses, Cattle, Sheep, and Pigs) according to sexes and differentiating between those over and under one year old.

Lambing, calving, and foaling during 1919 show a decrease on the previous year in each case.

Live stock slaughtered for consumption during 1919 show an increase in cattle of 6,367. Sheep an increase of 170,378 and pigs a decrease of 6,040.

The total wool clip, 39,214,336lbs., is a decrease on the previous year of 4,190,334 lbs. In addition, 7,085,045lbs. of wool was exported on skins during 1919, which is an increase on the quantity exported in similar manner during 1918 of 5,172,444lbs.

Meteorological Statistics.—The first quarter of the year 1919 was predominantly one of dry conditions. This feature presented a most serious aspect in the tropics, where drought prevailed throughout the summer months of 1918-19. The rainfall totals of the East and North Kimberley country for January were about equal to the usual monthly fall, and the whole of Kimberley recorded better results than usual during the succeeding month, but in the new divisions the summer rains failed completely. March opened with a tropical cyclone which was confined to the neighbourhood of Wyndham, where 17.58 inches fell during the first three days (13.52 above the March average), and about the end of the month an anti-cyclonic rain resulted in excesses at a few South Coastal, Southern Goldfields, and Eastern agricultural stations. Apart from these gaugings the total falls were amongst the lightest on record for the month of March.

Dry weather continued until April 16th, when a widespread storm affected all areas south of Condon, more particularly the Coolgardie Goldfields and Eastern and Southern portions of the wheat belt. This system passed away completely on April 19th, and a reversion to dry conditions took place, broken only by trivial coastal showers and an inland upper-air disturbance on May 5th, which accounted for excesses at isolated goldfield stations for that month.

From June 6th to 10th good agricultural rains were recorded, but after the disturbance cleared away an unsatisfactory disposition of isobaric control was set up, with the result that the normal winter rain-bearing systems were confined chiefly to the West and South-West coastal fringe. July conformed more closely to ordinary winter conditions, and good agricultural rains, penetrating frequently to the South Coolgardie Goldfield, resulted.

These falls were supplemented by chiefly satisfactory August rains, the most important of which fell on the 20th, when the North-West division participated. Several stations on the North-West Coast recorded phenomenal gaugings for the time of the year. In September, apart from a good general rain on the 2nd, the depression that visited our region followed paths far to the Southward and, although they were productive of frequent coastal showers, little rain penetrated to the wheat belt.

During the two succeeding months only two storms of importance, both monsoonal in character, visited Southern areas. Both occurred in the opening week of the month. The October visitation, affecting chiefly the Goldfields and Eastern and Central agricultural areas, and that of November, although more widespread, were heaviest over the South-East Goldfields, where many record totals for the month were encountered. A very similar disturbance, which also resulted in very heavy excesses over the Coolgardie Goldfields, occurred on December 10th.

Tropical thunder-rains commenced in November and were at first less active than usual, but during the final month of the year they increased greatly in frequency and importance, some gratifying excesses being disclosed at the end of the month.

Taking the year as a whole, the Coolgardie Goldfields (South-East Division) fared remarkably well, excesses ranging from one to eight inches. This was due to the magnificent rains of the latter half of the year, which easily constituted records at the majority of goldfields stations.

The other extreme was met with in the tropics, where the drought conditions of the previous year continued until August, 1919. An exceptional rainfall in that month, and good ordinary summer rains in December somewhat relieved the position in the De Grey and Kimberley, but only in the coastal portions of the latter division were excesses noted on the annual averages. In the Fortescue division the drought remained unbroken, Onslow registering only 1.23 inches for the whole year. Generally speaking, barely half the normal rainfall was recorded in the North-West division, and also over a large portion of the Gascoyne.

Turning to the South-West quarter of the State, deficiencies were again the rule, but only in isolated instances did they amount to more than one-fifth of the annual averages, while the extreme Eastern fringe of the wheat-growing country participated to some extent in the excesses recorded over the goldfields. As in the tropics, the tendency toward deficient rainfall was accounted for by dry weather in the earlier half of the year.

PART VI.—INDUSTRIAL ESTABLISHMENTS, 1919 (EXCLUSIVE OF MINES).

The 1919 statistics relative to such establishments in this State indicate the commencement of the expected revival of secondary industries after the inactivity of the war period.

During the twelve months under review their number had risen from 862 to 922, and the number of employees from 13,849 to 16,358. The number of persons of immature years (under 16) having, so far as females were concerned, remained practically stationary, and in males having shown only a slight rise of 39 youths, the increase indicates a growing tendency to adult employment.

It is only to be expected, when the fighting manhood of the State has been absorbed into the peaceful ranks of producers, that the production in factories and workshops should increase considerably. That this is so may be seen from the figures given below as to output, etc.

The total output of the State had risen from (roughly) £8,400,000 to £10,300,000, and that of certain principal industries of the State had increased as follows:—

Aerated Water Making, £87,599 to £106,387; Bacon Factories, £104,831 to £156,564; Boot and Shoe Making, £119,088 to £146,303; Breweries, £519,283 to £605,575; Brickworks, £38,160 to £57,004; Clothing and Tailoring, £235,587 to £383,235; Coach, Wheel, and Motor Works, £129,790 to £158,189; Fertilisers and Chemical Works, £279,229 to £333,498; Flour Milling, £1,546,261 to £1,987,019; Furniture Making and Upholstering, £152,215 to £196,336; Sawmilling (Forest), £456,135 to £692,790; Tanneries, £90,234 to £134,953; Wine Making, £15,717 to £23,904; Woolscouring and Fellmongering, £73,108 to £207,453.

It would be erroneous and misleading to give these increased values of output without pointing out that in many (if not all) instances a great deal of the increase is due to the enhanced war values of raw material, producing of course enhanced prices for the "turnover"; but, even allowing for this, it can be seen that great strides are being made towards a new era of prosperity in the manufactures of this State; and this apart from the fact that several large industrial enterprises, as for instance canning and meat-preserving works, have been started (or are about to be started) which must help materially in making this State self-contained and independent, to a certain extent, of outside supplies.

The salaries and wages paid increased from £1,863,213 to £2,317,872, and the capital invested in lands, buildings, machinery, etc., amounted to £6,357,000 in 1919, instead of £5,528,000 as in 1918.

Substantial increases in the horse-power of oil and electric engines used may be likewise noticed.

As in previous years, the foreign element in workmen is chiefly confined to a few industries, such as sawmilling, brewing, and wine making, furniture making, and quarrying. Amongst the aliens so employed were 153 Italians, 66 Greeks, and 50 Chinese, the other principal races represented in the grand total being Czecho-Slovaks, Jugo-Slavs, and Scandinavians.

Out of a total of about 500 working proprietors only 13 were recorded as non-British.

Amongst the products manufactured during the year were: 1,348,284 lbs. of leather; 21,091,728 bricks; 131,476,741 super. feet of timber; 141,516 tons of flour; 2,548,910 lbs. of confectionery; 5,774,924 gallons of beer and stout, and 226,268 pairs of boots, etc.

In addition to the tables directly relating to the secondary industries, there are added one referring to the pearl-shell industry and two embodying the latest rates of wages under Arbitration Court awards or agreements up to 30th June, 1920.

PART VII.—MINERAL STATISTICS AND WATER CONSERVATION, 1919-20.

Mineral Statistics.—In 1919 a considerable amount of activity was shown in the production of certain minerals in this State. Although the total *value* produced had fallen from £4,265,577 to £3,561,204, mainly owing to the continued decrease in the output of gold (*1918*, 876,511 fine ozs.; *1919*, 734,066 fine ozs.), yet the production of coal had risen from 337,039 tons to 401,713 tons, and the quantity of silver exported from 109,830 fine ozs. to 223,332 fine ozs. But in considering all such statistics it must be remembered that the quantity of any mineral exported in one year is not necessarily a guide as to the amount produced in the State during the same period.

In connection with the production of gold, it may be noted that although the prevailing tendency downwards was more or less marked in all the principal goldfields, yet on the Mt. Margaret field the amount produced was almost exactly the same as that in the previous year, and Pilbara and Broad Arrow both showed small increases.

The men reported as being employed in gold mining above and below ground, and those classed as "diggers," declined from 7,790 to 7,242, and those employed in "other" Mineral production from 1,475 to 1,104.

The total value of Gold-mining Machinery at the end of the year was £2,446,355, and of Machinery employed in Mining other than Gold £381,823.

The activity during the year is further exemplified by the number of prospecting areas applied for. The rise in the acreage of areas "outside proclaimed fields" (mainly doubtless due to the search for coal and oil) is reflected in the grand totals, which show 679 with an acreage of 51,511, as against 499 in the previous year with an acreage of 16,363.

The dividends in 1919 paid by Gold-mining Companies amounted to £338,244, making the grand total paid since the year 1890 £27,424,664.

The total amount of Coin produced at the Royal Mint to 30th June, 1920, was as follows:—

Value in sovereigns	£86,259,599
Value in half-sovereigns	£367,338

The gold bullion exported, *plus that received at the Royal Mint*, during 1919 weighed 734,066 fine ozs., which are taken as the standard "production" figures for the State.

Among other matters of interest may be noted the fact that 319 tons of Scheelite ore were reported to the Mines Department as having been produced in the State during the year.

Water Conservation.—Goldfields Water Supply Revenue shows an increase under one head only, namely, that of Railways. The consumption of that department (which excludes Railways, Midland District) rose from 82,000,000 to 93,000,000 gallons during 1919. The Revenue from the Metropolitan Water Supply, on the other hand, is again on the up-grade, being £96,882 during the year ended 30th June, 1920 (this being, of course, exclusive of that from the sewerage and drainage works). The total number of gallons supplied from this scheme was 2,256,100,000.

In the Towns (outside the metropolitan area), Agricultural, and Mines Water Supply Schemes little alteration occurred during the year, but the water supplied by the Railway Department has now risen to nearly 494,000,000 gallons.

PART VIII.—LAW, CRIME, ETC., 1919.

This Part of the Annual Statistical Register contains figures of the transactions of the Land Titles and Deeds Office up to the 30th June last, of Supreme Court business to 31st December, 1919; to the latter date, also, figures relative to cases that came before Magistrates' and Higher Courts, besides the general business of Local Courts, Wardens' Court, Licensing Courts, and Coroners' Courts; and finally an Abstract of the latest gaol and prisoners returns.

The cessation of the war period has at once been responsible for an increase in practically all the transactions of the Land Titles Office, that in Land Transfers being especially marked. The number of the latter, which from 8,008 in 1915-16 had fallen to 6,315 in 1917-18, with a partial recovery to 7,303 in 1918-19, rose to 13,198 in 1919-20, the respective considerations expressed varying from £1,703,701 to £1,662,388, £2,569,245, and £8,264,152. Mortgages also increased considerably, from 3,763 in 1917-18 to 4,331 in 1918-19, and 7,699 in 1919-20, with respective principal moneys secured amounting to £1,113,815, £1,660,968, and £7,159,524. It is scarcely doubtful that the settlement of returned soldiers on holdings and in homes was responsible for a large proportion of these increases. With but a comparatively slight increase in the office expenditure, viz., from £10,525 in 1918-19 to £13,284 (in 1915-16 it was £13,255), a greatly augmented revenue was collected, viz., £30,386, as against £18,542 in 1918-19 and £19,536 in 1915-16.

In the Supreme Court transactions, 1919, the number of Actions under Common Law show a slight increase, the amount involved, however, being considerably less than in the previous year, both of these years showing a large decrease as compared with the year 1915, when Actions numbered 1,324 and the amount involved was £93,658, whilst for 1919 the figures were 420 and £43,455 respectively.

In both the Probates and Letters of Administration increases were recorded in the values of Sworn Estates, the amounts being greater than in any year during the war period. The increases under Probate were from £1,121,093 in 1915 to £1,677,744 in 1919, and under Letters of Administration from £142,577 in 1915 to £774,083 in 1919, the respective amounts for 1918 being £1,274,654 and £169,183.

In the figures relating to Bankruptcy very considerable increases in the values of Assets and Liabilities are noticeable from 1918-19, but the amounts were still considerably less than during the three years prior to 1918. The Assets and Liabilities for 1919 were £21,190 and £23,958 respectively, as against £4,010 and £9,559 for 1918.

The Local Companies registered during 1919 numbered 64, with capitals amounting to £1,993,400, as against 53 with capitals amounting to £812,094 in 1915.

In the Crime Figures there was a further falling-off in the number of distinct persons brought before Courts of Justice as compared with previous years; for whilst in 1915 a total number of 11,976 appeared to answer charges, only 8,512 were so called in 1919. For the 9,769 offences charged against these persons (excluding aborigines) 8,702 convictions were recorded, of which (exclusive of Drunkenness itself) 1,392 were regarded as attributable to drink.

Whilst a reduction in the figures is shown on the whole, the number of offences committed against the person remained normal; but there was a greater number of charges of stealing than in prior years, there being 147 cases and 103 convictions more than in 1918. The offences against Good Order, which have been steadily decreasing for the last six years, are again less in 1919. During the year 1914, 11,342 such cases and 10,898 convictions were recorded, whilst in the year under review there were only 5,989 cases and 5,719 convictions, or approximately half of those in the year the war broke out. The principal reduction in the offences of this class is in that of Drunkenness, the 1919 figures being 2,898 cases and 2,881 convictions, or 2,897 cases and 2,899 convictions less than in the year 1914.

This satisfactory improvement in the social condition is due, in all probability, largely to the restriction of hours for public-houses under the War Precautions Act, the beneficial effects of which are being reflected in the decrease of all offences due to drink.

The number of all persons brought before the Courts has been less each year, a steady decrease being consistently maintained; the number in 1915 was 11,976, in 1918, 9,705, and in 1919, 8,512. These decreases, coincident with an increasing population, may be considered as eminently satisfactory. The total number of convictions (excluding neglected children and lunacy cases) in all Courts in 1915 was 13,642, or 4.23 per cent., and in 1919, 8,993, or 2.78 per cent. of the mean population.

The peremptory commitments to prison in 1919 were 711 in the Lower and 56 in the Higher Courts, whilst there were also 76 aborigines in the Lower and 48 in the Higher Courts committed to prison, the percentage of all commitments to all convictions being 9.37.

In the offences committed by Juveniles a slight increase is observed, principally in minor offences.

A regrettable feature noticeable is in the number of neglected and destitute children who are annually brought before the Children's Courts, the figures each year being between 400 and 500. Those for 1919 were 460.

In the Local Court figures, only slight increases are recorded for 1919, whilst Wardens' Court figures show a falling-off.

The number of Liquor Licenses granted during 1919 approximates closely to those of the previous five years, though the tendency since 1915 is towards a decrease.

PART IX.—HOSPITALS, CHARITABLE INSTITUTIONS, ETC., 1919.

The number of patients admitted for treatment to the various Government Hospitals in the State during 1919 was 5,150, while those remaining in from the previous year numbered 484, making a grand total of 5,634 persons. Of this number, 4,712 were discharged as either cured, relieved, or unrelieved, whilst 439 persons died and 483 patients remained in for further treatment.

The average daily number resident in Government Hospitals was 478.8, with an average residence for treatment of 310 days per patient.

The figures for the Assisted Hospitals for the period under review are as follow: 8,872 patients were admitted; 491 remained from the previous year, making a grand total of 9,363 persons. Of this number 8,160 were discharged as either cured, relieved, or unrelieved, whilst deaths numbered 749, and 454 remained for further treatment. The average daily number resident was 525.0, with an average residence of 21.5 days.

The most important diseases treated in both Government and Assisted Hospitals respectively were: Diphtheria, 206 and 545, with deaths 4 and 24; Influenza, 424 and 933, deaths 39 and 127; Tuberculosis of the Lungs, 425 and 84, deaths 138 and 20; Cancer of all kinds, 49 and 209, deaths 13 and 80; Typhoid Fever, 50 and 119, deaths 4 and 3; Pneumonia and Broncho-Pneumonia, 110 and 185, deaths 22 and 37; Bronchitis (acute and chronic), 100 and 167, deaths 3 and 2; Diseases of the Circulatory System, 185 and 379, deaths 32 and 55; Diseases of the Nervous System, 238 and 691, deaths 24 and 50; Puerperal conditions, 446 and 330, deaths 8 and 9; Alcoholism, 113 and 288, deaths 2 and 2.

The number of patients in the Hospital for the Insane at the end of the year was 1,148, an increase from the previous year of 25, whilst the deaths numbered 107, as against 98.

The inmates in the Homes for the Destitute numbered 651, an increase of 69 on the previous year, whilst the figure for the Women's Home, Fremantle, was 88, as against 78, an increase of 10 inmates.

The number of children in Orphanages and Industrial schools was 869, as against 831 for the previous year.

The number of State supported children amounted to 654, as against 647, an increase of 7 on the previous year.

The number of aborigines and half-caste aborigines was 384, a decrease of 66 from the previous year.

PART X.—EDUCATION, SCIENCE, AND ART, 1919-20.

Although the subsidies and grants from Consolidated Revenue to certain educational bodies, institutes, etc., have been practically stationary during the last few years, the vote to the Education Department itself still shows an increase each financial period, the increase for 1919-20 accounting for practically the whole of the £50,000 rise in expenditure on Education, Science, and Art, the figures being: 1918-19, Expenditure £377,152, 1919-20 £426,708, a difference of £49,556 from the previous year.

The annual cost per head, including administration of the Government Schools open at the end of 1919, was over £7 (taking as a basis of reckoning the *average attendance* of children).

The receipts of the Department "paid to revenue" showed a slight drop from £3,497 to £3,313 in 1919-20.

The majority of the male teachers who were absent with the Expeditionary Forces at the war having now returned, the number on duty in 1919 was 437, as against 391 in 1918. The average enrolment of individual scholars was 48,349, and the attendance 41,012.

In the Private Schools of the State the total of scholars in the last school week of 1919 increased by 320 from the number on the rolls twelve months previously.

The total number of scholars (both in Government and Private Schools) was, at the end of 1919, 59,127. This was exclusive of 557 scholars at the Perth Modern School and Goldfields (Kalgoorlie) High School. Special religious instruction was imparted during 1919 to an average attendance of 25,234 scholars, and was given in 392 distinct schools.

The cases of prosecutions for non-attendance at school were only 100 in number, 125 "exemptions," however, being granted by the department.

In connection with the Secondary School Scholarships, Bursaries, etc., scheme, provision is now being made for a limited number of fallen soldiers' children, and some scholarships were allotted during the year under review.

Continuation Classes.—The average of individual students (at the night classes) was 2,833 during 1919, in classes numbering 304.

The Technical Schools show an increase in the number of students during the year—satisfactory evidence of the desire for such education.

Our University, also, in spite of many disabilities, has apparently again performed good work, as testified by the 327 matriculated and 85 non-matriculated persons "attending lectures," and in addition to the conducting of examinations for "junior" and "leaving" certificates by its professors and lecturers, 132 certificates for the practice and 120 for the theory of music have been awarded as the result of examinations under a "combined" University scheme.

The following figures bearing on the use made of Public Library and Museum were recorded for the year:—

There were 111,737 visitors to the Public Library and 96,189 visitors to the Museum and Art Gallery during the year. 14,046 volumes are now in circulation among 156 different institutions in various parts of the country, through the medium of the "Travelling Libraries."

Notwithstanding the effects of the war, the Royal Society of W.A. has still close on 100 members, and the W.A. Society of Arts has been reconstructed, and has already held one exhibition of paintings, etc.

Facilities for social and literary intercourse outside the metropolitan area are provided for in the 87 mechanics' and miners' institutes, which have 140,000 volumes in their libraries.

There are also 170 Agricultural Halls in more or less active operation.

PART XI.—LOCAL GOVERNMENT, 1919.

Municipalities.—The abolition of the Municipalities of Broome and Mount Magnet during the latter part of 1918 is responsible for a decrease of two in the return under consideration. In spite, however, of this reduction in the number of towns classified as municipalities the total recorded population is 3,144 higher than that for the previous year, the municipal population being 151,575 as against 148,431 for 1918.

The number of dwelling-houses, 33,626, shows a decrease on the preceding year of 163, but if correct up-to-date figures were available for the Perth Municipality, no doubt the population would indicate a much higher increase, and, owing to the considerable amount of building in the metropolis, it is not improbable that the dwelling-houses would also show an increase.

No later population figures are available for Perth than those at the census of 1911, and for dwelling-houses those in the latter part of 1918.

The capital value of rateable property, including improvements (£26,172,435), shows an increase on the previous year of £94,560, whereas the Annual Value (£1,506,691) decreased by £3,045. £558,424 for the total revenue is an increase on the previous year of £10,247, and the expenditure, £558,720, an increase of £20,233.

The amount of Loans current on 31st October, 1919, £1,738,568, is a reduction on that for the previous year of £14,748, whilst the accrued Sinking Funds for the redemption of the Loans increased by £26,473.

The total length of Roads and Streets in existence on 31st October, 1919 (1,118 miles 18 chains), is 1 mile 48 chains less than in the previous year; this decrease is accounted for by particulars of the two defunct municipalities, mentioned above, being included in the figures for 1918.

Road Districts.—The number of Boards increased by two on the previous year, and the total area increased by one mile, which is owing to the inclusion of the area of two defunct municipalities. The area of all Municipalities and Road Districts combined is equal to the total area of the State.

Some of the Boards rate on the annual valuation, some on the unimproved capital valuation, and some partly on both, so that no really satisfactory comparison of the figures can be made with previous years.

The total revenue, £199,584, was an increase on the previous year of £4,558, whereas the expenditure, £204,112, was a decrease of £2,053.

The amount of Loans current on 30th June, 1919, £120,887, was an increase of £13,732 on the previous year, and the accrued Sinking Fund for the redemption of Loans, £9,603, also shows an increase, viz., £1,390.

The total length of cleared, formed, and metalled or otherwise constructed roads (33,669 miles 25 chains) was an increase on the previous year of 2,651 miles 37 chains; and the numbers of bridges (937), culverts (8,062), and wells, dams, and tanks (1,124) show increases respectively of 31, and 245, and 52; but constructed fords (1,499) show a decrease of 6. These figures are exclusive of three road districts, the particulars for roads, bridges, culverts, etc., not having been supplied by the responsible boards.

Local Boards of Health.—There were 23 Municipal and 97 other Boards of Health in existence in 1918-19, nine of the latter being inactive during the year. The combined revenue (£99,955) shows an increase on the previous year of £2,214, and the expenditure (£111,360) an increase of £12,120.

Fire Brigades.—The number of Fire Brigades (41) was one less than in the previous year, and the number of permanent firemen on the roll (106) was 3 less, whilst the number of volunteer firemen on the roll (536) was 46 more.

The actual fires attended (216) were 4 more than in the previous year, and the chimney and grass fires (364) 64 more.

The revenue, £26,299, was less than the previous year by £948, and the expenditure, £28,557, was £2,485 less.

Part XII.—MISCELLANEOUS, 1919-20.

The first subject dealt with in the few pages of this small publication is that of Parliamentary Rolls and Elections, giving the figures for the State Government, as well as for that of the Commonwealth in so far as the State is concerned. In the Return relative to Senate Elections and Referenda, it is noticeable that, whilst the number of electors enrolled has increased slightly, there were considerably fewer ballot papers issued for the last Referendum taken in December, 1919, on the question of "Legislative Powers" and "Nationalisation of Monopolies" than for that of December, 1917, when the question of "Military Service" was put before the people. The number of ballot papers issued in the former was 103,235, or 71.83 per cent., and in the latter 135,593, or 83.52 per cent. of the electors enrolled.

The Workers' Homes figures are given in a combined return for the seven years, ended 30th June, 1920. The total cost of the approved applications during that period was £642,712.

Newspaper publications in Western Australia in 1919 numbered 91, an increase of seven on the previous year. Five were dailies, forty-six weeklies, and twenty-six monthlies.

The State Labour Bureau's returns show that during the year ended 30th June, 1920, a total of 4,683 men and 1,371 women applied for employment, and for 3,596 of the former engagements were found, whilst 2,062 engagements in the aggregate were provided for the latter, including 1,752 engagements as day-workers, viz., laundresses and charwomen. The engagements for men included 1,950 for agricultural labour. A table detailing the assistance rendered to applicants shows that during its six years of operation the Bureau had advanced 9,249 fares, totalling in value £11,784, of which £9,533 had, to the 30th June last, been refunded.

A statement of the total West Australian War Funds collected to 30th June, 1919, amounting to £1,148,156, concludes this Part of the Statistical Register. (This statement has since been brought up to 31st December, 1920, and is republished in its revised form on page xix., at the end of these "Notes.")

STATISTICAL VIEW OF NINETY-ONE YEARS' PROGRESS IN WESTERN AUSTRALIA, 1829 TO 1919-20.

The subjects represented in this publication are in the main those constituting the more important departments of statistical compilation, and in these a selection has been made of what may be termed leading figures. They are: Population, Migration, Vital Statistics, Posts and Telegraphs, Consolidated Revenue and Expenditure therefrom, Loan Expenditure, Public Debt, Lands, Agriculture and Live Stock, Gold and Coal Production, Railways, State Savings Bank, Shipping, Totals of Imports and Exports, and Exports of Wool, Raw Gold, and other articles the produce of the State.

The combined figures are intended to give a clear and rapid survey of the history of the State from its foundation in 1829 to our days, as presented by the growth of the numbers expressing its progress.

* The mean population for the year is obtained as follows:—To the population at the end of the preceding year add four times the population on the 31st March of the year under review, twice the population on 30th June, four times the population on the 30th September, and the population on the 31st December, and divide the total by 12, which is the method now in use throughout the Commonwealth of Australia. Each quarterly mean is arrived at by adding together the number of the population at the beginning and at the end of the quarter and dividing the sum so obtained by two.

* Owing to the Commonwealth Government having discontinued the distinction between the State production and that of the other States of the Commonwealth, it is now impossible to show the oversea destination of locally produced exports in this table, as shown previous to the year 1911. In the case of the Interstate Transfers, however, the value of local produce exported to each State of the Commonwealth is shown in the summary of Table No. 6, page 83.

** Merchandise of Australian Origin previously exported and now returned to this State.

No. 5.—IMPORTS into the State of Western Australia during the Year ended 30th June, 1919.

Duties on British and Foreign Imports are collected under the provisions of the Commonwealth "Customs Tariff Act, 1902" (Edwd. VII., No. 14).

NOTE A.—On all British and Foreign Imports 10 per cent has been added to the fair market value of the goods at port of shipment.

NOTE B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

TRADE CLASSIFICATION.

Owing to the grouping of the Import and Export Items into Classes, in lieu of the alphabetical system followed in former years by the Customs Department, it has been decided to insert, for the convenience of the public, a résumé of the classes, together with a slightly condensed index of the items in alphabetical order.

No. 32.—Transactions of the Fremantle Harbour Trust and Bunbury Harbour Board during the undermentioned Periods.

NOTE.—The expenditure bases of the two Corporations are not the same. The Fremantle Harbour Trust employs all labour engaged in handling cargo on the wharves, whereas in the case of the Bunbury Harbour Board, general cargo is handled by the Railway Department for and on behalf of the Board and bulk cargo by the Stevedores, and no revenue (other than wharfage) is derived therefrom or expenditure thereon incurred.

NOTE.—In addition to the above figures the following particulars were also obtained :—Acreage of Planted Forest Trees, 1,822 acres ; Lands farmed on the "Share System" : For Cultivation, 19,180 acres. * The reason why Returns relative to certain alienated and leased lands are not obtained under the Statistics Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with lands which remain *entirely unimproved or unstocked*, and also in a lesser degree in the fact that small holdings under one acre in extent are exempted from supplying Returns. The Statistical returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose.

No. 10.—Acreage and Production of Wheat and Oats in each Statistical District, Sub-District, and Area for the Season ended 29th February, 1920.

NOTES.—1. *The rectangular areas* adopted, which are shown on the map attached to this part of the *Statistical Register*, are comprised within the sheet lines of the Standard Plans of the Survey Department. Being permanently fixed they are units that can be readily sub-divided and re-grouped at any future time into new districts and sub-districts without impairing their use for comparative purposes. Except where the areas are broken by the sea coast or other causes, the area numbers here printed in black type represent areas of 8,437½ square miles each, whilst those printed in ordinary type represent areas of 937½ square miles each, and the sub-area numbers marked A, B, C, or D, as the case may be, represent areas of 234⅜ square miles each. 2. Areas in parentheses and marked with an asterisk (*) are those for which the returns, if any, have been included in those of an adjacent area where the homestead is situated. In most instances, however, they are unoccupied as regards the headings shown. Areas marked (†) are portions of areas only.

NOTE.—This table has been compiled with the special object of showing the values of the importations into Western Australia in the past decade of such products of the soil and of live stock as might in the future be produced within the State, but are at present introduced to supply the deficiency in local production. It serves, in some respects, as a basis for calculations as to the market reasonably to be expected therein for home-grown products.

PART VI.—INDUSTRIAL ESTABLISHMENTS (Exclusive of Mines).

NOTE.—The Industrial Establishments here dealt with are those which, excluding Mines, come under the definition, adopted for statistical purposes, of Industrial Establishments, each being a "factory, workshop, or mill, where either four persons or more have been employed at any one time during the year, or where an engine driven by steam, gas, oil, or electricity has been used, whatever be the number of persons employed."

No. 1.—Classified numbers of Industrial Establishments (exclusive of Mines) from which Returns were received under the provisions of "The Statistics Act, 1907," and numbers of Males and Females employed, for each of the years 1914, 1918, and 1919.
